

MOHAMED HOSSAM

Backend Developer | Beni Suef, Egypt

Email: m.hossam1050@nub.edu.eg | Portfolio: mhossam.netlify.app

GitHub: github.com/mo-hossam-stack | LinkedIn: linkedin.com/in/mohamed-hossam-dev

SUMMARY

Backend Developer with strong expertise in building secure, scalable, and maintainable systems. Skilled in authentication, API design, database modeling, and system architecture. Delivered production-ready applications across healthcare, CRM, and gaming domains. Experienced with microservices, API security, and cloud-ready deployments. Quick learner who adapts fast to new frameworks and company-specific architectures.

EDUCATION

B.Sc. Computer Science – Nahda University, Beni Suef

Expected Graduation: 2028 | GPA: 3.23 / 4.0

TECHNICAL SKILLS

Core Concepts: System Design, Authentication & Authorization (JWT/OAuth2), RESTful APIs, Database Modeling, Microservices, Scalable Architecture, Agile

Security & Testing: CSRF/XSS Protection, SQL Injection Prevention, Role-Based Access Control, API Documentation (Swagger/Postman), CI/CD Basics, Debugging

Frameworks & Libraries: Django, DRF, OpenCV, NumPy, Pygame, Bootstrap

Databases: PostgreSQL, MySQL, MongoDB, SQLite

Cloud & Tools: Git/GitHub, Linux CLI, Docker (basic), AWS (basic), Bash, Postman

Languages: Python, JavaScript (ES6+), C++

PROJECTS

Dental Practice Management System (DPMS) – Django, PostgreSQL, Desktop Application

- Improved patient data handling and appointment scheduling, reducing manual errors by 30%.
- Enhanced financial tracking with automated outstanding balance calculations.
- Strengthened security with authentication and role-based access control.
- Designed a scalable database schema serving healthcare professionals for daily operations.

Django CRM Web Application – Django, Bootstrap

- Increased business efficiency by streamlining customer management workflows.
- Enabled secure user authentication and responsive dashboards for decision-making.
- Served as a modular platform with reusable templates and clean architecture.

Chess Game – Python, Pygame, NumPy

- Developed a complete chess desktop application with legal move validation and game state management.
- Designed for future scalability (AI opponent, online multiplayer).

CERTIFICATIONS

- CS50x – Introduction to Computer Science (Harvard)
- ALX Professional Foundations
- ALX Backend Web Development Program
